## DETAILED ACTION

### ***Election/Restrictions***

Applicant's election with traverse of 81-143 in Paper No. 14 is acknowledged.

The traversal is on the ground(s) that the order of the pulses, whether defibrillation first or sub-defibrillation threshold pulses first, is not relevant. This is found persuasive.

All claims have been treated on the merits.

### ***Claim Rejections - 35 USC § 112***

Claims 115-141 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 115 lacks antecedent basis for the "output control means" in step (e).

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

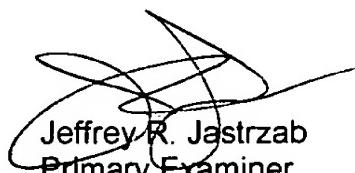

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 81-143 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No. 5978703. Although the conflicting claims are not identical, they are not patentably distinct from each other because the current claims amount to an obvious variant of the patented claims. Although the 5978703 patent does not claim defibrillation, it would have been obvious to those skilled in the art at the time of the invention to have incorporated defibrillation into that device in order to address fibrillation events not reversible by the sub-threshold pulses.
